SUMMARY

An enthusiastic full-stack web development student with Coder Academy. Learned HTML, CSS, JavaScript, Ruby, Ruby on Rails, jQuery, Bootstrap and React, etc, and utilised them to create multiple web apps/terminal apps. Eager to explore new technologies. 2+ years of experience in the translation industry with responsibilities including liaising with clients, performing quality control, and managing workflow for the project team.

SKILLSET

- HTML, CSS, SCSS, Ruby, Ruby on Rails
- JavaScript, jQuery, Mongo DB, Express JS, React JS, Node JS
- Git, Heroku, AWS, PostgreSQL, Trello, Stripe
- Photoshop, InDesign and Illustrator

PROJECTS

Furniture Land

Individual - Rails, JavaScript

- A second-hand furniture trading web app with a card-style layout.
- Has functions including account management, admin dashboard, search listings and filters, save listings, etc.
- Integrated third party APIs including Google map and Leaflet to show location for each listing.
- Support multiple image upload. Images are stored at AWS E3 and showed in a multiple-image slider.

Jungle Run

Individual - Ruby

- A CLI text adventure game built with Ruby.
- Including save and load function, player interaction(input, choices that lead the story) and battle function.
- Used TDD for the development.

Tweeter

Team - Rails, JavaScript

- A Twitter clone web app built in a team of two.
- Git-based cooperation & version control; the team finished the main functions including like button, hashtag, search, comment, etc. in a short timeframe.
- Responsible for searching, hashtag and user account functions.

WORK EXPERIENCE

Chin Communication

Melbourne, VIC
